Early Box 2030 Golden Box

This hybrid Kimchi cabbage has 45 days of maturity days after sowing. It shows 1.0~1.4kg of weight, around 260mm of height, 140mm of width, has yellow inner leaves and green outers.

Box type Mini Kimchi cabbage. The cabbage has around 50 days of maturity, high bolting resistance, excellent shape, can grow all season.

Variety	Maturity Days after sowing	Sowing Season	Leaf Color		Head			Head Shape	Disease Resistance
			Inner	Outer	Height(cm)	Width(cm)	Weight(kg)		
Jin Hong Ssam	30~60	All Season	Dark Purple	-	None Heading Type				
Asia Yellow Mini	55~60	All Season	Yellow	Dark Green	19~21	11~13	1.0~1.2	Cylindrical	
Early Box 2030	45	All Season	Yellow	Green	25	14	1.0~1.4	Box	
Golden Box	50	All Season	Yellow	Green	20	12	0.6~1	Box	

Pakchoi

Brassica rapa subsp. chinensis

Sing Sing Ha Gye

Pakchoi with average plant height of 19~21cm. Having erect growing habit with dark green leaves and light green stem. Grown all year round. Tolerance to both heat and cold.

Kingdom

Fast growing and excellent cultivation, The stem is thick and hard. Strong bolting tolerance. More narrow plant grow habit all year round.

Impact

Well-being vegetable. Fast growing and excellent cultivation, The leaves are wide and stem is thick and hard. Strong bolting tolerance. Wider plant grow habit all year round.

Black Summer

Pakchoi with dark green leaves. It is tall compared with other varieties. High yield due to many number of leaves.

Asia White

Dark green leaves with pure white mid-rib. 35~40 days maturity after sowing. Good for all year round growing. Early and compact. Tolerance to heat and bolting.

White Flash

Newly Improved bolting tolerant white pakchoi with dark green leaves and pure white mid-rib. Good for all year round growing, fast harvest and compact head. Tolerance to heat.

White Choi

Pakchoi with white stem color and green leaves. Showing uniformity at maturity and having tolerance to bolting.

Pakchoi

Brassica rapa subsp. chinensis

Red Choi

Pakchoi with red color leaves. Good coloring makes best for baby leaf usage.

Red Circle

Pakchoi with 16~23 days maturity after sowing. Dark Violet leaf with green petiole. Leaf shape is round. Shows good performance under the high temperature.

Purple Vita

Pakchoi with distinctive dark violet colored leaf with green petiole. Good for baby leaf mix. Good heat tolerance.

Epic High

Purple Pakchoi with very deep purple color. Good color expression even in the Summer Season.

CSCR

Pakchoi with Beautiful red colored leaves. Excellent uniformity. Heavy leaves makes good look for baby leaf mix usage.

Da Hong Winter

Pakchoi with attractive purple color. Suitable for baby mix. Good vigor during winter season.

Da Hong Summer

Pakchoi Hybrid with attractive purple color. Suitable for baby mix and is well grown especially in Summer Season.

Mizuna

Brassica rapa var. niposinica

Red Capital

Mizuna with serrated red leaves. Mainly grown for baby leaf salad mix. Fast growing.

Red Kingdom

Mizuna with fast growing ability. Good for baby leaf. Beautiful red with exotic shape. Give nice look for salad mix.

Rubycon

Mizuna with distinctive green stem with dark violet serrated leaf in color. Suitable for baby mix usage.

Purple Mibuna

Mizuna with serrated dark violet leaf and green petiole in color. Good vigor and excellent taste. Has higher natural components of "Glucosinolate and Gluconapin".

Central Red Plus

Mizuna with distinctive red color stem with green color leaf. Beautiful serrated leaves.

Tatsoi

Brassica rapa subsp. Narinosa

Brassicaceae

Heuk Cheong Chae

Dark green color. compare to the other pakchoi having slight black color. Very vigorous during the high temperature and can be grown all year round in the plastic house. Thick leaves enable to keep high productivity and long lasting freshness.

Red Tatsoi

Tatsoi hybrid with red colored leaves. Mainly grown for baby leaf purposes. Suitable for spring and autumn sowing.

Red Pine

Komatsuna

Leaves are similar to common pakchoi with relatively thin petiole. Good looking red purple color leaf. Fast growing and suitable for baby leaf uses.

Green Giant

Komatsuna

Dark green colored Komatsuna. Can be harvested 21~45 days after sowing. Fast growing and erect type with round leaves. Suitable for all year round.

Mustard

Group of *Brassica rapa* subsp.

Red Feather

All year round growing mustard. Leaf shape has deep serration which makes it similar to a feather. Peculiar mustard flavor.

Red Rake

Broad leaf mustard with good red color. Mild pungency. Suitable for salad and baby leaf.

Asia Jeok

Vigorous growing leaves in deep purple-red with green mid rib. Thick, tender, and spicy leaves with excellent flavor. Good for cooking and pickling. Very popular mustard Kimchi in Korea.

The Mustard

Mustard with violet colored leaves. The plants has uniformity and strong mustard flavor. Suitable for Autumn sowing.
